Status key: `Not Run` · `In Progress` · `Pass` · `Fail` · `Blocked` · `Partial`

How we work (simple)

1. Do **one phase at a time** — don't skip ahead.
2. When a phase is done, tell your lead: **"Phase X complete — Pass/Blocked/Fail."**
3. If stuck, ask before moving on.
4. Mark **Blocked** when keys, S3, or UAT logins are missing (not Fail).
5. Save screenshots in folder: `uat-evidence-2026-09-02-<commit-short>/`

Phase 0 — Setup (ENV)

Step	What	Status	Notes
ENV-01	Record commit + same build for FE/BE	**Pass**	Commit `5916d458…`; BE/FE both HTTP 200
ENV-02	Get 15 UAT personas from lead	**Partial**	7 Learn Fresh accounts found in DB; missing specialized personas
ENV-03	Backend Lite flags + v1 keys	**Partial**	Projects + Onboarding ON; Finance/Payroll OFF (no keys)
ENV-04	File Storage (S3) + ClamAV	**Blocked**	Not configured in `.env`
ENV-05	Frontend mock off + restart	**Pass**	Mock false; user browser screenshot pending
ENV-06	Evidence folder + browser setup	**Pass**	`uat-evidence-2026-09-02-5916d45/`
